## Claim Rejections - 35 USC § 101

1. 35 U.S.C. 101 reads as follows:

Whoever invents or discovers any new and useful process, machine, manufacture, or composition of matter, or any new and useful improvement thereof, may obtain a patent therefor, subject to the conditions and requirements of this title.

2. Claim 9 is rejected under 35 U.S.C. 101 because the claim is directed to a recording medium storing nonfunctional descriptive material.

Data structures not claimed as embodied in computer-readable media are descriptive material per se and are not statutory because they are neither physical "things" nor statutory processes. See, e.g. Warmerdam, 33 F.3d at 1361, 31 USPQ2d at 1760 (claim to a data structure per se held nonstatutory) and merely claiming nonfunctional descriptive material stored in a computer-readable medium does not make it statutory. See MPEP 2106.IV.B.1.

## Allowable Subject Matter

- 3. Claims 10-12 contain allowable subject matter over the prior art of record.
- 4. The following is a statement of reasons for the indication of allowable subject matter:

The claimed invention is directed to a method of reproducing information from a recording medium. The independent claims identify the feature of "a third area provided in the first area configured to allow first manufacturer's information to be recorded therein; a fourth area provided in the third area configured to allow first manufacturer ID information to be recorded therein; a fifth area provided in the third area and located behind the fourth area configured to allow first specific information of the manufacturer to be recorded therein; a sixth area provided in the second area configured to allow

second manufacturer's information to be recorded therein; a seventh area provided in the sixth area configured to allow second manufacturer ID information to be recorded therein; an eighth area provided in the sixth area configured to allow second specific information of the manufacturer to be recorded therein; a ninth area provided in the sixth area configured to allow recording time required for recording the second specific information of the manufacturer to be recorded therein; and a tenth area provided in the second area configured to allow general information for the object file to be recorded therein, the general information being allocated to a preceding position of the second manufacturer's information." The closest prior art, Kikuchi et al is directed to a conventional data reproducing apparatus, either singularly or in combination fails to anticipate or render the above underlined limitations obvious.

Page 3

## Conclusion

5. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

Kitamura et al discloses a data-recording medium having reproduction timing information and system for reproducing record data by using the reproduction timing information.

Yamane et al discloses a data recording/reproducing apparatus.

Kikuchi et al discloses a data reproduction apparatus.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Bob Chevalier whose telephone number is 571-272-

Application/Control Number: 10/803,058

7374. The examiner can normally be reached on MM-F (9:00-6:30), second Monday

off.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, James Groody can be reached on 571-272-7950. The fax phone number

for the organization where this application or proceeding is assigned is 703-872-9306.

Information regarding the status of an application may be obtained from the

Patent Application Information Retrieval (PAIR) system. Status information for

published applications may be obtained from either Private PAIR or Public PAIR.

Status information for unpublished applications is available through Private PAIR only.

For more information about the PAIR system, see http://pair-direct.uspto.gov. Should

you have questions on access to the Private PAIR system, contact the Electronic

Business Center (EBC) at 866-217-9197 (toll-free).

B. Chevalier June 25, 2005.
